Portfolio Analysis – Gearing 117.1%

The gearing figure is calculated by dividing the Trust's gross assets by its net assets. This calculation ignores the effect of any cash or fixed interest holdings.

Manager Comment

Stock markets continued to perform well in June notwithstanding the continuing rise in oil prices and somewhat mixed economic news. Hopes that the Fed's tightening cycle might be maturing helped to support share prices while, in Europe, optimism increased about the likelihood of the ECB cutting rates. The US marked time over the month but both European and Asian shares performed well. Technology shares were mixed while the dollar continued to advance against most currencies.

June was a quiet month for corporate news. However, we were encouraged by further M&A announcements as well as by some positive earnings comments from Oracle and from a number of select semiconductor stocks. Second quarter earnings should be reasonably good although expectations in some areas have crept up and company comments regarding the outlook will be critical.

Our asset allocation has remained pretty much unchanged over the month. However, we have taken advantage of some opportunities to add a few new names in the European portfolio, predominantly in the wireless data area. We continue to hold some liquidity in order to take advantage of the possibility that the current tougher economic environment should flush out some earnings disappointments over the next few months.

Brian Ashford-Russell/Ben Rogoff, 1st July 2005

Investment Management Team

Polar Capital Technology Trust is managed by the Polar Capital Partners technology team. Polar Capital was established by the senior technology fund managers previously responsible for Henderson's specialist technology funds.

Brian Ashford-Russell: Was Head of the Technology Team at Henderson (previously Touche Remnant) from 1987 until his resignation to set up Polar Capital in September 2000. He has been the appointed fund manager of Polar Capital Technology Trust since its launch in 1996 as Henderson Technology Trust, and was also the manager of HTT's predecessor, TR Technology, from 1988 to 1998. He managed the Henderson Global Technology Unit Trust from its launch in 1984 to 1996 as well as a number of other funds.

Tim Woolley: Was responsible for the North American specialist technology portfolios at Henderson. He joined Henderson in 1996 from (Aberdeen) Prolific where he managed the Technology Unit Trust from 1993 to 1996. He managed Henderson Global Technology Unit Trust and Henderson Horizon Global Technology Fund from 1996 until his resignation to set up Polar Capital in September 2000.

Ben Rogoff: Has been a technology specialist for eight years having begun his career in fund management at CMI as a global tech analyst. He moved to Aberdeen Fund Managers in 1998 where he spent four years as a senior technology manager prior to joining Polar Capital in May 2003. He is responsible for the management of Polar Capital's US technology portfolios.

The Trust

Investment Approach: Polar Capital Technology Trust selects companies for their potential for generating capital growth, not on the basis of technology for its own sake. We believe in rigorous fundamental analysis and focus on;

- management quality
- the identification of new growth markets
- the globalisation of major technology trends, and
- exploiting international valuation anomalies and sector volatility

Rationale: Over the last two decades the technology industry has been one of the most vibrant, dynamic and rapidly growing segments of the global economy. Technology companies offer the potential for substantially faster earnings growth than the broad market, reflecting the accelerating rate of adoption of new technology. Technology is transforming the competitive position of companies and entire economies, thereby fuelling a major secular increase in technology spending.

Polar Capital Technology Trust PLC is an investment trust listed and traded on the London Stock Exchange.

All sources Polar Capital Partners unless otherwise stated. Please remember that past performance is not necessarily a guide to future performance. Stock markets and currency movements may cause the value of investments and the income from them to fall as well as rise and investors may not get back the amount originally invested. Where investments are made in emerging markets, unquoted securities or smaller companies, their potential volatility may increase the risk to the value of, and the income from, the investment. Issued in the UK by Polar Capital Partners Ltd. Polar Capital Partners Limited is authorised and regulated by the Financial Services Authority.
