

## Is 5G telecoms hype or reality?

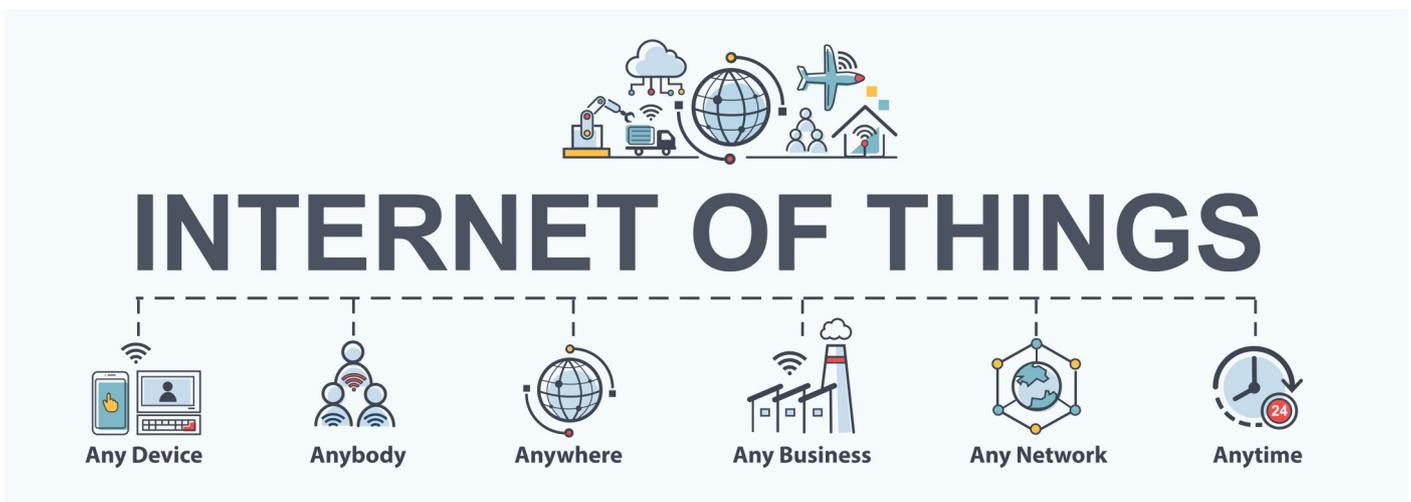

While many of us are still getting used to 4G networks – 3G for some – 5G is already here. It is available in a few cities rather than most countries so is not yet close to mass acceptance but by 2024 it is estimated that 40% of the world’s population will have 5G coverage<sup>1</sup>.

To put its availability in context, EE launched the first 5G network in the UK in May, starting with a limited service in six cities; in the US, Verizon has only just started making 5G devices available, AT&T sells a 5G hotspot rather than handsets and Sprint is expected to introduce its first 5G devices early in the summer. It was first launched anywhere on a commercial network in South Korea while neighbour and technology giant China is lagging the rest of the world when it comes to introducing this kind of next-generation technology, with 2020 its own likely launch date.

5G, the fifth generation of wireless networks, promises to provide users with better responsiveness, greater bandwidth and faster download speeds – it is expected to be 100 times faster than 4G – as well as the ability for operators to develop new products, applications and services, then deliver them more cost-effectively. This will allow consumers to access the internet faster, get faster mobile connections, upload videos more quickly and stream movies more smoothly.

Despite the debate around 5G technology’s readiness, the telecoms industry has clearly started to embrace it given the volume of activity seen in 2018 in readiness for its roll-out across the UK this year. We have counted at least 201 operators worldwide who have already initiated 5G projects, up from 154 a year ago<sup>2</sup>.

To give an idea of the step-up for 4G, according to Borje Ekholm, CEO at Ericsson: “No previous generation of mobile technology has had the potential to drive economic growth in the way that 5G promises. It goes beyond connecting people to the possibility of making the internet of things (IoT) and the fourth industrial revolution a reality. 5G has the ability to drive a digital society where everything that can benefit from being connected will be connected.”

While the previous four generations have all been about delivering faster connectivity – with the consumer’s abilities moving from making calls to texting to using data to streaming video – 5G is much more enterprise and company focused. It will allow applications ranging from the IoT – anything with a chip in it, such as an alarm clock, a vending machine or smart TV – to connected cars, autonomous trucks and cloud-based gaming. These are all genuinely cutting-edge innovations.

5G should also allow a number of new applications based on machine-to-machine and machine-to-human communication, all because of what we know as ultra-low latency, one of the key improvements of 5G. A low latency means a high speed of a signal being sent and received, the speed an action follows an instruction – imagine playing Fortnite and there being a noticeable delay between moving the controller and moving your on-screen character. More broadly, low latency should enable the proliferation of the IoT, potentially challenging how data is created, stored and analysed in the future. This in turn should drive semiconductor demand, an area we are particularly excited about.

A radio access network (RAN) is that part of the mobile telecoms system that sits between a device and a signal, connecting a device to the network. This is arguably the most obvious area to benefit as 5G will support a network upgrade in a market that has seen no, or even negative, growth and severe pricing pressure for a number of years despite being dominated by the likes of Huawei, Ericsson, Nokia and Samsung.

The whole area of 5G is not without risks, at a technological, corporate and political level. Recent concerns around Huawei technology’s security, the arrest in Canada of its chief financial officer, allegations that the company has violated Iran sanctions, and scepticism from a UK security chief on certain “shortcomings” the company may have, have led to several countries, spearheaded by the US, to boycott Huawei products. Ericsson and Samsung appear to have been the biggest share gainers so far while Nokia has not been able to keep up, being held back by product and execution issues.

These RAN upgrades will allow greater radio content which will lead to a higher number of antennae which will further boost demand for semiconductors. The Bank of America forecasts the 5G-related semiconductor market will reach \$18bn by 2022, quadrupling from about \$4bn this year, split into \$6bn for infrastructure and the rest for mobile/IoT.

RAN upgrades will lead to greater capacity and efficiency but only if all manner of support is in place from, among others, a core network that can handle the data tsunami on its way, optical components, new frequency bands (using millimetre wave technology), hardware and compound semiconductors, the next generation of semiconductors.

For every positive comment – “I think this is the beginning of the fourth generation of the industrial revolution. 5G will be the platform linking billions of devices together”: Kaan Terzioglu, Turkcell’s CEO – there is a counter – “I think a lot of the hype is where things are going to be 10 years from now with 5G, not what it will be at launch”: Ron Marquardt, Sprint’s vice president of technology, innovation and architecture. While 5G remains in its infancy today, momentum is building nicely and we expect it to move from hype to reality over the coming years.

**Important Information:** This document is provided for the sole use of the intended recipient and is not a financial promotion. It shall not and does not constitute an offer or solicitation of an offer to make an investment into any Fund or Company managed by Polar Capital. It may not be reproduced in any form without the express permission of Polar Capital and is not intended for private investors. This document is only made available to professional clients and eligible counterparties. The law restricts distribution of this document in certain jurisdictions; therefore, it is the responsibility of the reader to inform themselves about and observe any such restrictions. It is the responsibility of any person/s in possession of this document to inform themselves of, and to observe, all applicable laws and regulations of any relevant jurisdiction. Polar Capital Technology Trust plc is an investment company with investment trust status and as such its ordinary shares are excluded from the FCA's (Financial Conduct Authority's) restrictions which apply to non-mainstream investment products. The Company conducts its affairs and intends to continue to do so for the foreseeable future so that the exclusion continues to apply. It is not designed to contain information material to an investor's decision to invest in Polar Capital Technology Trust plc, an Alternative Investment Fund under the Alternative Investment Fund Managers Directive 2011/61/EU ("AIFMD") managed by Polar Capital LLP the appointed Alternative Investment Manager. In relation to each member state of the EEA (each a "Member State") which has implemented the AIFMD, this document may only be distributed and shares may only be offered or placed in a Member State to the extent that (1) the Fund is permitted to be marketed to professional investors in the relevant Member State in accordance with AIFMD; or (2) this document may otherwise be lawfully distributed and the shares may otherwise be lawfully offered or placed in that Member State (including at the initiative of the investor). As at the date of this document, the Fund has not been approved, notified or registered in accordance with the AIFMD for marketing to professional investors in any member state of the EEA. However, such approval may be sought or such notification or registration may be made in the future. **Therefore, this document is only transmitted to an investor in an EEA Member State at such investor's own initiative.** SUCH INFORMATION, INCLUDING RELEVANT RISK FACTORS, IS CONTAINED IN THE COMPANY'S OFFER DOCUMENT WHICH MUST BE READ BY ANY PROSPECTIVE INVESTOR.

**Statements/Opinions/Views:** All opinions and estimates constitute the best judgment of Polar Capital as of the date hereof, but are subject to change without notice, and do not necessarily represent the views of Polar Capital. This material does not constitute legal or accounting advice; readers should contact their legal and accounting professionals for such information. All sources are Polar Capital unless otherwise stated.

**Third-party Data:** Some information contained herein has been obtained from third party sources and has not been independently verified by Polar Capital. Neither Polar Capital nor any other party involved in or related to compiling, computing or creating the data makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any data contained herein.

**Holdings:** Portfolio data is "as at" the date indicated and should not be relied upon as a complete or current listing of the holdings (or top holdings) of the Company. The holdings may represent only a small percentage of the aggregate portfolio holdings, are subject to change without notice, and may not represent current or future portfolio composition. Information on particular holdings may be withheld if it is in the Company's best interest to do so. It should not be assumed that recommendations made in future will be profitable or will equal performance of the securities in this document. A list of all recommendations made within the immediately preceding 12 months is available upon request. This document is not a recommendation to purchase or sell any particular security. It is designed to provide updated information to professional investors to enable them to monitor the Company.

**Benchmarks:** The following benchmark index is used: Dow Jones World Technology Index (Total Return). This benchmark is generally considered to be representative of the Technology Equity universe. This benchmark is a broad-based index which is used for comparative/illustrative purposes only and has been selected as it is well known and is easily recognizable by investors. Please refer to [www.djindexes.com](http://www.djindexes.com) for further information on this index. Comparisons to benchmarks have limitations as benchmarks volatility and other material characteristics that may differ from the Company. Security holdings, industry weightings and asset allocation made for the Company may differ significantly from the benchmark. Accordingly, investment results and volatility of the Company may differ from those of the benchmark. The indices noted in this document are unmanaged, are unavailable for direct investment, and are not subject to management fees, transaction costs or other types of expenses that the Company may incur. The performance of the indices reflects reinvestment of dividends and, where applicable, capital gain distributions. Therefore, investors should carefully consider these limitations and differences when evaluating the comparative benchmark data performance. Information regarding indices is included merely to show general trends in the periods indicated, it is not intended to imply that the Company was similar to the indices in composition or risk.

**Regulatory Status:** Polar Capital LLP is a limited liability partnership number OC314700. It is authorised and regulated by the UK Financial Conduct Authority ("FCA") and is registered as an investment adviser with the US Securities & Exchange Commission ("SEC"). A list of members is open to inspection at the registered office, 16 Palace Street, London, SW1E 5JD. FCA authorised and regulated Investment Managers are expected to write to investors in funds they manage with details of any side letters they have entered into. The FCA considers a side letter to be an arrangement known to the Investment Manager which can reasonably be expected to provide one investor with more materially favourable rights, than those afforded to other investors. These rights may, for example, include enhanced redemption rights, capacity commitments or the provision of portfolio transparency information which are not generally available. The Company and the Investment Manager are not aware of, or party to, any such arrangement whereby an investor has any preferential redemption rights. However, in exceptional circumstances, such as where an investor seeds a new fund or expresses a wish to invest in the Company over time, certain investors have been or may be provided with portfolio transparency information and/or capacity commitments which are not generally available. Investors who have any questions concerning side letters or related arrangements should contact the Polar Capital Desk at the Registrar on 0800 876 6889. The Company is prepared to instruct the custodian of the Company, upon request, to make available to investors portfolio custody position balance reports monthly in arrears.

**Information Subject to Change:** The information contained herein is subject to change, without notice, at the discretion of Polar Capital and Polar Capital does not undertake to revise or update this information in any way.

**Forecasts:** References to future returns are not promises or estimates of actual returns Polar Capital may achieve. Forecasts contained herein are for illustrative purposes only and does not constitute advice or a recommendation. Forecasts are based upon subjective estimates and assumptions about circumstances and events that have not and may not take place.

**Performance/Investment Process/Risk:** Performance is shown net of fees and expenses and includes the reinvestment of dividends and capital gain distributions. Factors affecting the Company's performance may include changes in market conditions (including currency risk) and interest rates and in response to other economic, political, or financial developments. The Company's investment policy allows for it to enter into derivatives contracts. Leverage may be generated through the use of such financial instruments and investors must be aware that the use of derivatives may expose the Company to greater risks, including, but not limited to, unanticipated market developments and risks of illiquidity, and is not suitable for all investors. Those in possession of this document must read the Company's Investment Policy and Annual Report for further information on the use of derivatives. Past performance is not a guide to or indicative of future results. Future returns are not guaranteed and a loss of principal may occur. Investments are not insured by the FDIC (or any other state or federal agency), or guaranteed by any bank, and may lose value. No investment process or strategy is free of risk and there is no guarantee that the investment process or strategy described herein will be profitable.

**Allocations:** The strategy allocation percentages set forth in this document are estimates and actual percentages may vary from time-to-time. The types of investments presented herein will not always have the same comparable risks and returns. Please see the private placement memorandum or prospectus for a description of the investment allocations as well as the risks associated therewith. Please note that the Company may elect to invest assets in different investment sectors from those depicted herein, which may entail additional and/or different risks. Performance of the Company is dependent on the Investment Manager's ability to identify and access appropriate investments, and balance assets to maximize return to the Company while minimizing its risk. The actual investments in the Company may or may not be the same or in the same proportion as those shown herein.

**Country Specific disclaimers:** The Company has not been and will not be registered under the U.S. Investment Company Act of 1940, as amended (the "Investment Company Act") and the holders of its shares will not be entitled to the benefits of the Investment Company Act. In addition, the offer and sale of the Securities have not been, and will not be, registered under the U.S. Securities Act of 1933, as amended (the "Securities Act"). No Securities may be offered or sold or otherwise transacted within the United States or to, or for the account or benefit of U.S. Persons (as defined in Regulation S of the Securities Act). In connection with the transaction referred to in this document the shares of the Company will be offered and sold only outside the United States to, and for the account or benefit of non U.S. Persons in "offshore- transactions" within the meaning of, and in reliance on the exemption from registration provided by Regulation S under the Securities Act. No money, securities or other consideration is being solicited and, if sent in response to the information contained herein, will not be accepted. Any failure to comply with the above restrictions may constitute a violation of such securities laws.
