Fund Manager Comment

Market Performance

August is traditionally a quiet and seasonally weak period for equity investors, and this year proved no exception. However, beyond equities there were a number of exciting developments, the oil price continuing its sharp correction (falling a further 7%) and the trade-weighted US Dollar rallying significantly. Sterling was exceptionally weak, losing more than 8% against the US Dollar which resulted in the FTSE World index rising 6.3% in Sterling terms during the month. Sliding commodity prices, despite hostility between Georgia and Russia, likely suggests that the market is more concerned that the global slowdown has intensified. Similarly Dollar strength (ordinarily indicative of a strong domestic economy) also likely reflects worsening macroeconomic conditions beyond the US. As a result, US equities meaningfully outperformed their global peers during the month.

Technology Performance

The technology sector was a relative out-performer, the Dow Jones World Technology Index rising 9.9% in Sterling terms, largely due to disproportionate exposure to the US equity market. Within the sector, news flow was sparse. Demand for a number of technology commodities has appeared to weaken with LCD (monitors and TV), DRAM and NAND flash pricing all failing to benefit from the normal seasonality associated with 'back to school' demand. On a positive note there were significant increases to Chinese telecom capital spending plans which should benefit a number of our holdings. Two other areas of relative strength continue to be ultra portable notebooks and smart phones. Both are benefiting from a range of innovative new product introductions, whilst smart phones are also gaining from a shift in operator subsidies away from more mainstream handsets.

Outlook

The recent downturn in oil prices should be no surprise given the backdrop of slowing global growth. Whilst an unequivocal longer term positive, sharply lower oil prices may reflect demand destruction today which probably explains why equities have responded disappointingly to what ordinarily should be a positive impulse. We continue to believe that heightened volatility is likely to persist, with equities unlikely to stage a meaningful rally until earnings expectations have been reset to more realistic levels or until macro economic visibility has improved. Employment trends will be closely monitored as they will provide a strong indicator of future consumer spending.

On a more medium-term basis we continue to believe that recent inflation / stagflation concerns are misguided and reflect the confluence of a number of cyclical pressures - low interest rates, emerging market growth and high energy prices - that have created the perfect inflationary storm. The current global slowdown appears to be already having the desired effect on a number of those variables and as a result we remain sanguine about the inflationary backdrop. In due course we expect the abatement of inflationary pressure to allow stocks (and other financial assets) to positively re-rate. As we have previously argued, we believe the case for investing in technology today is compelling, despite the macroeconomic uncertainty. The most recent capital spending cycle has been muted which reduces the risk of a pronounced capital spending downturn whilst strong sector balance sheets should provide support should conditions continue to deteriorate.

Ben Rogoff, 8th September 2008

Trust Overview

Objective

The investment objective is to maximize capital growth for our shareholders through investing in a diversified portfolio of technology companies around the world.

Investment Rationale

Over the last two decades the technology industry has been one of the most vibrant, dynamic and rapidly growing segments of the global economy. Technology companies offer the potential for substantially faster earnings growth than the broad market, reflecting the accelerating rate of adoption of new technology. Technology is transforming the competitive position of companies and entire economies, thereby fuelling a major secular increase in technology spending.

Full details of the Investment Objective, Rational and Strategy are available on the company's website.

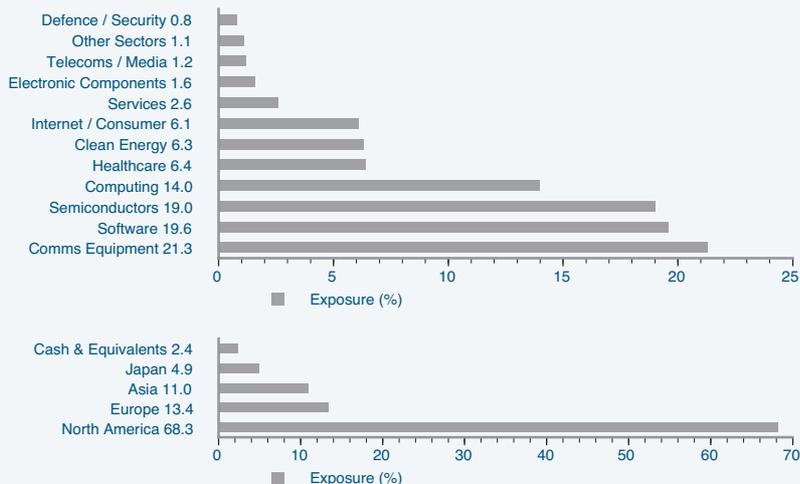

Approach

Polar Capital selects companies for their potential for generating capital growth, not on the basis of technology for its own sake. We believe in rigorous fundamental analysis and focus on: management quality, the identification of new growth markets, the globalisation of major technology trends, and exploiting international valuation anomalies and sector volatility.

Fact sheet

Polar Capital Technology Investment Management Team

Polar Capital Technology Trust is managed by the Polar Capital technology team. Polar Capital was established by the senior technology fund managers previously responsible for Henderson's specialist technology funds. Today's Polar Capital technology team comprises of six investment professionals.

Ben Rogoff - Fund Manager

In May 2006, he took over the responsibility for managing the portfolio following three successful years running the US portfolio. Ben has been a technology specialist for over ten years, having begun his career in at CMI as a global tech analyst. He moved to Aberdeen Fund Managers in 1998 as a senior technology manager prior to joining Polar Capital in May 2003.

Craig Mercer - Deputy Manager

In May 2006, Craig became the Deputy Manager of the Trust. Craig has nine years fund management experience. He joined Scottish Equitable (later Aegon) in 1997 after gaining an economics degree from York University. He was responsible for the Aegon Japan OEIC. At Polar Capital he focuses on Japanese technology stocks, working closely with the Polar Capital Japan team.

Technology Investment Management Team:

Brian Ashford-Russell - Founder/Director of Polar Capital

Brian was head of the technology team at Henderson Global Investors (and prior to that Touche Remnant) from 1987 until his resignation in September 2000 to set up Polar Capital. He has been the appointed fund manager of Polar Capital Technology Trust plc, previously named Henderson Technology Trust and its predecessor TR Technology, since TR Tech's launch in 1988. He also managed the Henderson Global Tech Unit Trust from its launch in 1984 to 1996 as well as co-managing the Seligman Global Tech and Mackenzie Universal Science & Tech funds.

Tim Woolley - Founder/Director of Polar Capital

Tim began his career as a systems analyst for two leading financial service companies. He then joined Prolific as a trainee US fund manager in 1987 and was promoted to lead manager of the technology fund in 1993. He joined Henderson's technology team in 1996 and launched the Henderson Horizon fund that focused on small and mid cap companies. Tim left with Brian to establish Polar Capital in 2001.

Nick Evans - Fund Manager

Nick recently joined Polar Capital and has 8 years experience as a technology specialist. He was previously Head of Technology at AXA Framlington where, since August 2001, he had been lead manager of the AXA Framlington Global Technology Fund and the AXA World Fund (AWF) - Framlington Global Technology. Prior to this he spent three years as a Pan European Investment Manager and Technology Analyst at Hill Samuel Asset Management. He started his career as an IT graduate trainee at Lloyds TSB. He graduated from Hull University with a degree in Economics with Business Economics in 1994.

Emma Parkinson - Fund Manager

Emma has worked with Brian and Tim for the last fifteen years as a European technology analyst, initially at Henderson and at Polar Capital from its formation. Prior to this she was a US small cap specialist with Touche Remnant and Charterhouse Bank.

Fatima Iu - Analyst

Fatima joined Polar Capital in April 2006 after working as an analyst with Citigroup Asset Management for 18 months. She graduated from Imperial College London in 2002.
