Fund Manager Comment

Market Performance

June proved to be another poor month for equity markets as macroeconomic worries drove risk appetite sharply lower, the FTSE World Index falling 6.2% in Sterling terms. With little news emanating from companies ahead of Q2 earnings season, attention was firmly fixed on disappointing US economic data, augmented by ongoing concerns over European sovereign risk and a perceived slowdown in China. Whilst the month began uneventfully, a raft of disappointing US datapoints not only challenged the forecast recovery trajectory but that also raised the spectre of a so-called 'double-dip'. With labour markets failing to register the improvement anticipated at this point in the cycle (evidenced by weak May non-farm payroll data and disappointing initial jobless claims), ancillary weakness in retail sales trends and poor housing starts / sales took on greater significance. A particularly weak consumer confidence survey added further to the gloom, US ten year Treasury bond yields moving sharply lower (falling from 3.30% to 2.95%) during the month. This resulted in a deluge of down days in equity markets during the second half of the month as the contraction in growth expectations weighed on investor sentiment and the performance of risk assets.

Technology Performance

In a reversal of recent fortunes, technology stocks trailed the broader market during the month, the Dow Jones World Technology index falling 8.3% in Sterling terms. Whilst the underperformance of US equities in June did not help their cause, technology stocks were also disproportionately impacted by the strengthening Dollar that may have prompted investors to take profits ahead of Q2 earnings season. This was most keenly felt by large cap companies (given their global reach) that underperformed their smaller, more domestically orientated peers. This dynamic was a key contributor to relative fund performance during the month. The contraction in growth expectations disproportionately impacted the most cyclical sub-sectors, such as semiconductors as investors began to question the veracity of 2011 estimates. Networking stocks also fared poorly as a result of Nokia's mid-month profit warning and lacklustre results from Research in Motion. With Apple launching its next-generation iPhone during the month (and selling more than 1.7m devices in just three days) it is clear that smart phone competition is beginning to take its toll on handset incumbents.

Outlook

Whilst the combination of Euro weakness and disappointing US macroeconomic has resulted in negative net revisions to earnings expectations, we remain confident that a 'double-dip' will be averted despite recent headlines to the contrary. With the 2008 credit crisis likely to have left an indelible mark on most investors, weak data will likely take on far greater significance than it may ultimately warrant. We have read elsewhere with interest how markets post 1987 had to contend with so-called 'echoes' following the crash. We suspect that today's consternation is more likely to be an 'echo' of the recent credit crisis rather than a genuine threat to the recovery. However, sentiment will likely wax and wane as investors weigh compelling valuations (global equities trading on just over 10x 2011 forecasts) against the downside associated with a faltering recovery and the prospect of deflation. We have spent much of this calendar year trading this range of investor emotions and as such have used the recent weakness to reinvest much of the liquidity raised in late May.

With Q2 earnings season fast approaching, we are hopeful that attention will begin to shift back towards bottom-up fundamental improvement and the compelling valuations on offer today in our sector. A very quiet pre-announcement season, together with sub-seasonal expectations should help ensure a solid earnings season. Whilst we had been mindful of potential risk to third-quarter estimates (that bake in above-seasonal sequential progress), recent market weakness and a concomitant deterioration in investor expectations have significantly ameliorated this concern. With the technology sector trading at just a market multiple on a forward earnings basis (despite its vastly superior aggregate balance sheet) we think the recent weakness represents an excellent entry point for longer-term investors. This is particularly true now that a new technology cycle has finally commenced, a view we espoused more fully during our recently published report and accounts. Please let us know if you would like us to send you a copy if you do not already have one.

Ben Rogoff, 8th July 2010

Trust Overview

Objective

The investment objective is to maximise capital growth for our shareholders through investing in a diversified portfolio of technology companies around the world.

Investment Rationale

Over the last two decades the technology industry has been one of the most vibrant, dynamic and rapidly growing segments of the global economy. Technology companies offer the potential for substantially faster earnings growth than the broad market, reflecting the accelerating rate of adoption of new technology. Technology is transforming the competitive position of companies and entire economies, thereby fuelling a major secular increase in technology spending.

Full details of the Investment Objective, Rational and Strategy are available on the company's website.

Approach

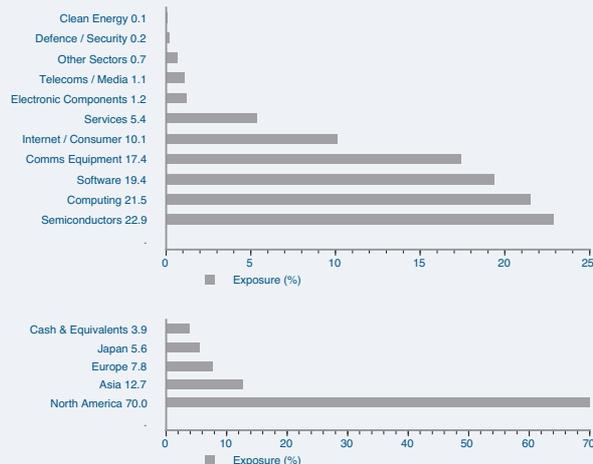

Polar Capital selects companies for their potential for generating capital growth, not on the basis of technology for its own sake. We believe in rigorous fundamental analysis and focus on: management quality, the identification of new growth markets, the globalisation of major technology trends, and exploiting international valuation anomalies and sector volatility.

It should not be assumed that recommendations made in future will be profitable or will equal performance of the securities in this list. A list of all recommendations made within the immediately preceding 12 months is available upon request.

Fact sheet

Polar Capital Technology Investment Management Team

Polar Capital Technology Trust is managed by the Polar Capital technology team. Polar Capital was established by the senior technology fund managers previously responsible for Henderson's specialist technology funds. Today's Polar Capital technology team comprises of six investment professionals.

Ben Rogoff - Fund Manager

Ben has been a technology specialist for twelve years having begun his career in fund management at CMI as a global tech analyst. He moved to Aberdeen Fund Managers in 1998 where he spent four years as a senior technology manager prior to joining Polar Capital in May 2003. He is lead manager of Polar Capital Technology Trust plc, with responsibility for the management of Polar Capital's US technology portfolios. He is also joint manager of Polar Capital Global Technology Fund. Ben graduated from St Catherine's College, Oxford in 1995.

Craig Mercer - Deputy Manager

Craig joined Polar Capital in 2002 from Scottish Equitable (later Aegon) where he managed their Japan OEIC. Craig is deputy manager of Polar Capital Technology Trust plc and is responsible for coverage of Asian technology and global alternative energy stocks. Craig has an Economics degree from York University.

Technology Investment Management Team:

Nick Evans - Fund Manager

Nick joined Polar Capital in September 2007 and has eleven years experience as a technology specialist. He was previously Head of Technology at AXA Framlington and Citywire 'A' rated. He was lead manager of the AXA Framlington Global Technology Fund and the AXA World Fund (AWF) - Framlington Global Technology (both rated five stars by S&P) between Aug 2001 and July 2007. Prior to this he spent three years as a Pan European Investment Manager and Technology Analyst at Hill Samuel Asset Management. Nick has an Economics degree from Hull University.

Fatima lu - Analyst

Fatima joined Polar Capital in April 2006 after working as an analyst with Citigroup Asset Management for 18 months. She focuses on European technology stocks and has responsibility for coverage of the global medical technology sub-sector. Fatima graduated from Imperial College London in 2002 with a Masters in Chemistry.

Brian Ashford-Russell - Founder/Director of Polar Capital

Brian was head of the technology team at Henderson Global Investors (and prior to that Touche Remnant) from 1987 until his resignation in September 2000 to set up Polar Capital. He has been the appointed fund manager of Polar Capital Technology Trust plc, previously named Henderson Technology Trust and its predecessor TR Technology, since TR Tech's launch in 1988. He also managed the Henderson Global Tech Unit Trust from its launch in 1984 to 1996 as well as co-managing the Seligman Global Tech and Mackenzie Universal Science & Tech funds.

House View

This document has been produced based on Polar Capital research and analysis and represents our house view. All sources are Polar Capital unless otherwise stated.

Important Information

All sources are Polar Capital unless otherwise stated. It is not a recognised scheme under s.76 of the Financial Services Act 1986 and its promotion is restricted to persons permitted by the Financial Services (Promotion of Unregulated Schemes) Regulations 1991.

The information provided in this document shall not and does not constitute an offer or solicitation of an offer to make an investment into any fund managed by Polar Capital. It may not be reproduced in any form without the express permission of Polar Capital.

This document is only made available to the intended recipient. Any other person who receives this document should not rely upon it.

This document does not provide all information material to an investor's decision to invest in the Polar Capital Technology Trust PLC, including, but not limited to, risk factors.

Statements/Opinions/Views

All opinions and estimates in this report constitute the best judgment of Polar Capital as of the date hereof, but are subject to change without notice, and do not necessarily represent the views of Polar Capital. Polar Capital is not rendering legal or accounting advice through this material; readers should contact their legal and accounting professionals for such information.

Third-party Data

Some information contained herein may have been obtained from other third party sources and has not been independently verified by Polar Capital. Polar Capital makes no representations as to the accuracy or the completeness of any of the information herein. Neither Polar Capital nor any other party involved in or related to compiling, computing or creating the data makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data.

Holdings

The top 10 positions were selected based on percentage of AUM. This portfolio data is "as at" the date indicated and should not be relied upon as a complete or current listing of the holdings (or top holdings) of the fund. The holdings may represent only a small percentage of the aggregate portfolio holdings, are subject to change without notice, and may not represent current or future portfolio composition. Information on particular holdings may be withheld if it is in the fund's best interest to do so. A complete list of the portfolio holdings are available upon request. It should not be assumed that any of the securities transactions or holdings discussed was or will prove to be profitable, or that the investment recommendations or decisions we make in the future will be profitable or will equal the investment performance of the securities discussed herein. The information provided in this document should not be considered a recommendation to purchase or sell any particular security.

Benchmarks

The following benchmark index is used: Dow Jones World Technology Index (Total Return). This benchmark is generally considered to be representative of the Technology equity universe. This benchmark is a broad-based index which is used for comparative/illustrative purposes only and has been selected as it is well known and is easily recognizable by investors. Please refer to www.djindexes.com for further information on this index. Comparisons to benchmarks have limitations because benchmarks have volatility and other material characteristics that may differ from the fund. For example, investments made for the fund may differ significantly in terms of security holdings, industry weightings and asset allocation from those of the benchmark. Accordingly, investment results and volatility of the fund may differ from those of the benchmark. Also, the index noted in this presentation is unmanaged, are not available for direct investment, and is not subject to management fees, transaction costs or other types of expenses that the fund may incur. In addition, the performance of the index reflects reinvestment of dividends and, where applicable, capital gain distributions. Therefore, investors should carefully consider these limitations and differences when evaluating the comparative benchmark data performance. The information regarding the index is included merely to show the general trends in the periods indicated and is not intended to imply that the fund was similar to the index in composition or risk.

Regulatory Status

This document is Issued in the UK by Polar Capital. Polar Capital LLP is a limited liability partnership number OC314700. It is authorised and regulated by the Financial Services Authority. A list of members is open to inspection at the registered office, 4 Matthew Parker Street, London SW1H 9NP

Information Subject to Change

The information contained herein is subject to change, without notice, at the discretion of Polar Capital and Polar Capital does not undertake to revise or update this information in any way.

Forecasts

References to future returns are not promises or even estimates of actual returns Polar Capital may achieve, and should not be relied upon. The forecasts contained herein are for illustrative purposes only and are not to be relied upon as advice or interpreted as a recommendation. In addition, the forecasts are based upon subjective estimates and assumptions about circumstances and events that may not yet have taken place and may never do so.

Performance

Performance is shown net of fees and expenses and includes the reinvestment of dividends and capital gain distributions. Many factors affect fund performance including changes in market conditions and interest rates and in response to other economic, political, or financial developments. Investment return and principal value of your investment will fluctuate, so that when your investment is sold, the amount you receive could be less than what you originally invested. Past performance is not a guide to or indicative of future results. Future returns are not guaranteed and a loss of principal may occur. Stock markets and currency movements may cause the value of investments and the income from them to fall as well as rise and investors may not get back the amount originally invested. Where investments are made in emerging markets, unquoted securities or smaller companies, their potential volatility may increase the risk to the value of, and the income from, the investment. Investments are not insured by the FDIC (or any other state or federal agency), are not guaranteed by any bank, and may lose value.

Investment Process - Risk

No investment process or strategy is free of risk and there is no guarantee that the investment process or strategy described herein will be profitable. Investors may lose all of their investments.

Allocations

The strategy allocation percentages set forth in this document are estimates and actual percentages may vary from time-to-time. The types of investments presented herein will not always have the same comparable risks and returns. Please see the private placement memorandum for a description of the investment allocations as well as the risks associated therewith. Please note that the fund may elect to invest assets in different investment sectors from those depicted herein, which may entail additional and/or different risks. The actual performance of the fund will depend on the Investment Manager's ability to identify and access appropriate investments, and balance assets to maximise return to the fund while minimising its risk. The actual investments in the fund may or may not be the same or in the same proportion as those shown herein.
