Fund Manager Comment

Market Review

Equities continued to move higher before selling off sharply during the second half of the month, the FTSE World falling 4.8% in Sterling terms. The intra-month pullback was more considerable, global equities falling more than 8% from highs. With a number of our indicators pointing to elevated investor sentiment (no doubt reflecting the c. 21% advance made by global equities in Q3 alone), it did not take much to presage some profit-taking. The catalyst for increased risk aversion came in the form of mixed macroeconomic data (disappointing initial jobless claims and housing starts) and an oil price which rose 9% in US Dollar terms. The idea that sentiment had become somewhat complacent was seemingly supported by stock action during third-quarter earnings season. Whilst the fundamentals continue to show good progress, resultant stock moves have been disappointing reflecting expectations that had already anticipated upside to consensus forecasts.

Technology Review

The technology sector fell in line with the market, the Dow Jones World Technology index retreating 5.0% in Sterling terms. Whilst third-quarter earnings season has been broadly positive, there has been a marked divergence of fortunes within the sector best defined by those able to deliver revenue upside, and those still dependent on inventory replenishment or cost-cutting to meet (or beat) expectations. 'Blow-out' quarters from a number of next-generation companies including Apple, Google and Amazon were in sharp contrast to lacklustre reports from technology incumbents such as Nokia, SAP and IBM. A notable exception to this trend was a strong report from Microsoft, due to the combination of muted expectations and the launch of their new operating system, Windows 7. While most semiconductor companies have continued to see fundamental improvement, stocks have reacted poorly which suggests that the market is not currently willing to pay for supply-side improvement without further evidence of a pick-up in end-demand.

Outlook

Despite the likelihood of greater volatility going forwards - a function of how far stocks have advanced from their lows - we continue to be constructive as we expect the key determinants of valuations - interest rates, inflation and earnings revisions to remain supportive. We are also intrigued by how few people appear willing to seriously consider the potential for a 'V-shaped' recovery, even though we do not rely on one in our own (constructive) base case. Furthermore, the equity sell-off - non-confirmed by the bond market - has already resulted in a sharp and healthy adjustment to investor sentiment. As such, we have used the pullback to reinvest (post month end) most of the liquidity raised at the end of September.

We remain upbeat about the technology sector's likely progress given its superior earnings profile, balance sheets and undemanding relative valuations. However, we are even more excited about our new cycle thesis that appears to be gaining considerable traction. It may well be that in hindsight, Q3 earnings season turns out to be the point where new cycle beneficiaries part company from more mature incumbents. With IT budget growth likely to prove underwhelming and cost-cutting efforts largely played out, we expect the market to refocus on companies that can deliver genuine top-line growth. As the bifurcation between 'new' and 'old' becomes more apparent we would expect M&A activity to continue to increase which in turn should support our view that investing in last-generation companies on the basis of their (not so) "free cash flows" is fallacious once a new cycle has commenced.

Ben Rogoff, 6th November 2009

Trust Overview

Objective

The investment objective is to maximise capital growth for our shareholders through investing in a diversified portfolio of technology companies around the world.

Investment Rationale

Over the last two decades the technology industry has been one of the most vibrant, dynamic and rapidly growing segments of the global economy. Technology companies offer the potential for substantially faster earnings growth than the broad market, reflecting the accelerating rate of adoption of new technology. Technology is transforming the competitive position of companies and entire economies, thereby fuelling a major secular increase in technology spending.

Full details of the Investment Objective, Rational and Strategy are available on the company's website.

Approach

Polar Capital selects companies for their potential for generating capital growth, not on the basis of technology for its own sake. We believe in rigorous fundamental analysis and focus on: management quality, the identification of new growth markets, the globalisation of major technology trends, and exploiting international valuation anomalies and sector volatility.

It should not be assumed that recommendations made in future will be profitable or will equal performance of the securities in this list. A list of all recommendations made within the immediately preceding 12 months is available upon request.

Fact sheet

Polar Capital Technology Investment Management Team

Polar Capital Technology Trust is managed by the Polar Capital technology team. Polar Capital was established by the senior technology fund managers previously responsible for Henderson's specialist technology funds. Today's Polar Capital technology team comprises of six investment professionals.

Ben Rogoff - Fund Manager

In May 2006, he took over the responsibility for managing the portfolio following three successful years running the US portfolio. Ben has been a technology specialist for over twelve years, having begun his career in at CMI as a global tech analyst. He moved to Aberdeen Fund Managers in 1998 as a senior technology manager prior to joining Polar Capital in May 2003.

Craig Mercer - Deputy Manager

In May 2006, Craig became the Deputy Manager of the Trust. Craig has twelve years fund management experience. He joined Scottish Equitable (later Aegon) in 1997 after gaining an economics degree from York University. He was responsible for the Aegon Japan OEIC. At Polar Capital he focuses on Japanese technology stocks.

Technology Investment Management Team:

Nick Evans - Fund Manager

Nick recently joined Polar Capital and has eleven years experience as a technology specialist. He was previously Head of Technology at AXA Framlington where, since August 2001, he had been lead manager of the AXA Framlington Global Technology Fund and the AXA World Fund (AWF) - Framlington Global Technology. Prior to this he spent three years as a Pan European Investment Manager and Technology Analyst at Hill Samuel Asset Management. He started his career as an IT graduate trainee at Lloyds TSB. He graduated from Hull University with a degree in Economics with Business Economics in 1994.

Fatima lu - Analyst

Fatima joined Polar Capital in April 2006 after working as an analyst with Citigroup Asset Management for 18 months. She graduated from Imperial College London in 2002.

Brian Ashford-Russell - Founder/Director of Polar Capital

Brian was head of the technology team at Henderson Global Investors (and prior to that Touche Remnant) from 1987 until his resignation in September 2000 to set up Polar Capital. He has been the appointed fund manager of Polar Capital Technology Trust plc, previously named Henderson Technology Trust and its predecessor TR Technology, since TR Tech's launch in 1988. He also managed the Henderson Global Tech Unit Trust from its launch in 1984 to 1996 as well as co-managing the Seligman Global Tech and Mackenzie Universal Science & Tech funds.

Tim Woolley - Founder/CEO of Polar Capital

Tim began his career as a systems analyst for two leading financial service companies. He then joined Prolific as a trainee US fund manager in 1987 and was promoted to lead manager of the technology fund in 1993. He joined Henderson's technology team in 1996 and launched the Henderson Horizon fund that focused on small and mid cap companies. Tim left with Brian to establish Polar Capital in 2001.

House View

This document has been produced based on Polar Capital research and analysis and represents our house view. All sources are Polar Capital unless otherwise stated.

Important Information

All sources are Polar Capital unless otherwise stated. It is not a recognised scheme under s.76 of the Financial Services Act 1986 and its promotion is restricted to persons permitted by the Financial Services (Promotion of Unregulated Schemes) Regulations 1991.

The information provided in this document shall not and does not constitute an offer or solicitation of an offer to make an investment into any fund managed by Polar Capital. It may not be reproduced in any form without the express permission of Polar Capital.

This document is only made available to the intended recipient. Any other person who receives this document should not rely upon it.

This document does not provide all information material to an investor's decision to invest in the Polar Capital Technology Trust PLC, including, but not limited to, risk factors.

Statements/Opinions/Views

All opinions and estimates in this report constitute the best judgment of Polar Capital as of the date hereof, but are subject to change without notice, and do not necessarily represent the views of Polar Capital. Polar Capital is not rendering legal or accounting advice through this material; readers should contact their legal and accounting professionals for such information.

Third-party Data

Some information contained herein may have been obtained from other third party sources and has not been independently verified by Polar Capital. Polar Capital makes no representations as to the accuracy or the completeness of any of the information herein. Neither Polar Capital nor any other party involved in or related to compiling, computing or creating the data makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data.

Holdings

The top 10 positions were selected based on percentage of AUM. This portfolio data is "as at" the date indicated and should not be relied upon as a complete or current listing of the holdings (or top holdings) of the fund. The holdings may represent only a small percentage of the aggregate portfolio holdings, are subject to change without notice, and may not represent current or future portfolio composition. Information on particular holdings may be withheld if it is in the fund's best interest to do so. A complete list of the portfolio holdings are available upon request. It should not be assumed that any of the securities transactions or holdings discussed was or will prove to be profitable, or that the investment recommendations or decisions we make in the future will be profitable or will equal the investment performance of the securities discussed herein. The information provided in this document should not be considered a recommendation to purchase or sell any particular security.

Benchmarks

The following benchmark index is used: Dow Jones World Technology Index (Total Return). This benchmark is generally considered to be representative of the Technology equity universe. This benchmark is a broad-based index which is used for comparative/illustrative purposes only and has been selected as it is well known and is easily recognizable by investors. Please refer to www.djindexes.com for further information on this index. Comparisons to benchmarks have limitations because benchmarks have volatility and other material characteristics that may differ from the fund. For example, investments made for the fund may differ significantly in terms of security holdings, industry weightings and asset allocation from those of the benchmark. Accordingly, investment results and volatility of the fund may differ from those of the benchmark. Also, the index noted in this presentation is unmanaged, are not available for direct investment, and is not subject to management fees, transaction costs or other types of expenses that the fund may incur. In addition, the performance of the index reflects reinvestment of dividends and, where applicable, capital gain distributions. Therefore, investors should carefully consider these limitations and differences when evaluating the comparative benchmark data performance. The information regarding the index is included merely to show the general trends in the periods indicated and is not intended to imply that the fund was similar to the index in composition or risk.

Regulatory Status

This document is Issued in the UK by Polar Capital. Polar Capital LLP is a limited liability partnership number OC314700. It is authorised and regulated by the Financial Services Authority. A list of members is open to inspection at the registered office, 4 Matthew Parker Street, London SW1H 9NP

Information Subject to Change

The information contained herein is subject to change, without notice, at the discretion of Polar Capital and Polar Capital does not undertake to revise or update this information in any way.

Forecasts

References to future returns are not promises or even estimates of actual returns Polar Capital may achieve, and should not be relied upon. The forecasts contained herein are for illustrative purposes only and are not to be relied upon as advice or interpreted as a recommendation. In addition, the forecasts are based upon subjective estimates and assumptions about circumstances and events that may not yet have taken place and may never do so.

Performance

Performance is shown net of fees and expenses and includes the reinvestment of dividends and capital gain distributions. Many factors affect fund performance including changes in market conditions and interest rates and in response to other economic, political, or financial developments. Investment return and principal value of your investment will fluctuate, so that when your investment is sold, the amount you receive could be less than what you originally invested. Past performance is not a guide to or indicative of future results. Future returns are not guaranteed and a loss of principal may occur. Stock markets and currency movements may cause the value of investments and the income from them to fall as well as rise and investors may not get back the amount originally invested. Where investments are made in emerging markets, unquoted securities or smaller companies, their potential volatility may increase the risk to the value of, and the income from, the investment. Investments are not insured by the FDIC (or any other state or federal agency), are not guaranteed by any bank, and may lose value.

Investment Process - Risk

No investment process or strategy is free of risk and there is no guarantee that the investment process or strategy described herein will be profitable. Investors may lose all of their investments.

Allocations

The strategy allocation percentages set forth in this document are estimates and actual percentages may vary from time-to-time. The types of investments presented herein will not always have the same comparable risks and returns. Please see the private placement memorandum for a description of the investment allocations as well as the risks associated therewith. Please note that the fund may elect to invest assets in different investment sectors from those depicted herein, which may entail additional and/or different risks. The actual performance of the fund will depend on the Investment Manager's ability to identify and access appropriate investments, and balance assets to maximise return to the fund while minimising its risk. The actual investments in the fund may or may not be the same or in the same proportion as those shown herein.
